O. Deferred Payment Agreement - Residential:

Generally the Company will offer any eligible residential customer or applicant a deferred payment agreement with specific terms as required by 16 NYCRR 11.10 which sets forth in detail the procedures summarized here. The agreement will be made in duplicate on the form set forth in Rule 20.F of this tariff.

(a) Eligibility:

All residential customers and applicants are eligible for an agreement unless the customer has broken an existing payment agreement which required payment over a period at least as long as the standard agreement described below, or the Public Service Commission determines that the customer or applicant has the resources to pay the bill.

(b) Written Offers:

A specific written offer will be made to eligible customers before the date of any threatened termination of service, where payment of outstanding charges is a requirement for reconnection or acceptance of an application for service, and when a customer has broken an agreement that was for a shorter period than the standard agreement.

(c) Negotiating Agreements:

Before making a written offer, the Company will make a reasonable effort to contact eligible customers or applicants in order to negotiate agreement terms that are fair and equitable considering the customer's financial circumstances. The Company may, at its discretion, require the customer to complete a form showing his or her assets, income and expenses and provide reasonable substantiation of such information, and if it does so, shall treat all such information confidentially. A. Right to Inspect:

A duly authorized officer or agent of the Company may enter, at all reasonable times, any building or other location supplied with service by the Company for the inspection and examination of meters, pipes, fittings, and works for supplying or regulating the supply of gas and of ascertaining the quantity of gas supplied, provided such agent exhibits a photo-identification badge and written authority as provided in Section 65(9) of the Public Service Law.

B. Duty to Inspect:

Except to the extent prevented by circumstances beyond its control, the Company shall conduct a field inspection of Company apparatus supplying a customer as soon as reasonably possible and within 60 calendar days of the following:

C. Penalty:

A customer who misses two (2) or more scheduled appointments for the completion of leakage surveys and corrosion inspections in inside piping in accordance with the Commission's guidelines in Case 15-G-0244 or who, at any time, directly or indirectly prevents or hinders a duly authorized officer or agent of the Company from entering the building or location, or from making an inspection or examination at any reasonable time, may be billed a \$100 penalty charge for each such offense as provided in Section 65(9)(b) of the Public Service Law. Subsequent termination of gas service may occur (i) if the \$100 fine is billed and the fine goes unpaid, provided that such termination shall follow the already-existing termination procedures in Article 2 of the Public Service Law and 16 NYCRR Part 11; or (ii) upon 15 days' notice to the customer and after notice to the Department of Public Service, which notice shall be submitted first to the Department of Public Service for review, where a customer is assessed the \$100 fine and pays the fine but subsequently does not allow access to the building or location for the completion of leakage surveys and corrosion inspections.

12. LIABILITY OF COMPANY:

The Company will not be liable for any injury, casualty or damage resulting in any way from the supply or use of gas or from the presence or operation of the Company's structures, equipment, pipes, appliances or devices on the customer's premises, except injuries or damages resulting from the negligence of the Company.

The Company will endeavor at all times to provide a regular and uninterrupted supply of service, but in case the supply of service shall be interrupted or irregular or defective or fail from causes beyond its control or through ordinary negligence of employees, the Company will not be liable thereof.

13. SERVICE:

A. Gas Curtailment Plan

The Company may, pursuant to the orders of the New York Public Service Commission, conserve the supply of gas for higher priority customers, curtail or discontinue service to lower priority customers when in the Company's sole judgment it deems its gas supply to be insufficient to meet all requirements of its existing customers. The Company may curtail or discontinue gas service in accordance to the curtailment plan set forth below without incurring any liability for any subsequent loss or damage that the customer may sustain through such curtailment or discontinuance.

The Company shall implement a curtailment only as a last resort. Mutual aid, contractual and other non-curtailment supply management tools, Operational Flow Orders, interruption of contractually-interruptible load, and supply acquisition shall be utilized before a curtailment is declared.

As circumstances permit, the Company will initially seek voluntary curtailments to alleviate an emergency situation. Economic considerations shall not be the basis for a curtailment. Curtailments shall be limited in scope and duration as necessary to alleviate an emergency and shall be localized to the extent possible.

(a) Curtailment Notification:

The Company will provide periodic updates to Marketers and curtailed customers so that they can plan accordingly.

The Company will notify the Director of the Office of Electric, Gas and Water of the New York State Department of Public Service when a curtailment is declared and when the situation returns to normal.

(b) Marketer and Direct Customer Compliance:

Failure of the Company to adhere to one or more of the curtailment criteria is not a basis for Marketers or Direct Customers not to comply with requirements of the curtailment but may provide the basis for a complaint to the Commission regarding the Company's behavior.

(b) Marketer and Direct Customer Compliance: (Cont'd.)

If, during the curtailment period, the Company is aware of Marketers or Direct Customers that are not responding to the required actions, it shall make all reasonable efforts to inform the non-responding Marketers or Direct Customers that required actions are not being taken. Lack of such notice shall not relieve any Marketer or Direct Customer of its obligations.

Upon the request of the Company, each Marketer serving transportation customers on the Company's system shall provide to the Company a plan for curtailment of its customers.

(c) Gas Requirements during a Curtailment:

During a period of curtailment, the Company will acquire gas intended for lower priority customers at the citygate. Marketers and Direct Customers whose gas is diverted by the Company will be required to continue making nominations of gas throughout the curtailment period up to their maximum delivery obligation as directed by the Company, unless qualified upstream force majeure interruptions or curtailments prevent Marketers or Direct Customers from securing or delivering such supplies.

(d) Compensation:

The Marketer will be the party compensated for the diverted gas. To the extent individual transportation customers are affected by directing the payment to the Marketer, they will enter into contractual arrangements with the Marketer that clearly spell out the resolution of compensation issues between the customer and the Marketer related to occasions when gas supplies are diverted.

Compensation for the diverted gas will be the market price of gas, defined as the Gas Daily Dominion South Point Common (mid-point) price plus DTI FT variable and fixed charges plus losses to the Company's City Gate. If it can be demonstrated by the Marketer or Direct Customer, with adequate support, that a contract calls for a higher price, the Company would reimburse the Marketer or Direct Customer at the contract price. Compensation costs will be recovered from customers via the Gas Adjustment Clause or equivalent mechanism, subject to Commission review.

(e) Order of Curtailment:

Non-core loads would be shut off first, to preserve service to higher priority customers that do not have alternatives to the use of gas. If the situation required extension of curtailments into firm service categories, all customers, whether or transportation or sales customers, would be curtailed according to the utilities tariffs where priority is identified by end use category, with essential human needs customers having the highest priority. Plant protection would continue to be a high priority. To the extent the physical operation of its

C. New or Additional Gas Service: (Cont'd.)

The Company will not supply gas for any equipment for any premises unless application for such load was registered with the Company prior to the connection of such equipment and written approval thereof was given to the Company.

In anticipation of periods of stringency of gas supply, the Company reserves the right to defer the supply of gas to new loads in such manner as to cause the least hardship to present and prospective consumers, taking into consideration the volume of natural gas available and the capacities of local mains and facilities.

New or additional gas service will be provided to all customers under the following conditions:

- (a) The Company may attach any customer having annual requirements of less than 12,000 Mcf.
- (b) Service to any new customer or increased service to any existing customer having annual requirements of 12,000 Mcf or more will be provided only when the customer has installed dual-fuel capacity equivalent to the increment above such ceiling and will be subject to approval of the New York State Public Service Commission.

When anticipated gas supplies are not sufficient to serve all new loads applied for in one of the above categories, priority will be given in the order in which an application was registered with the Company, provided that the new equipment is connected within 90 days after notice from the Company that it may be served.

When evidence available to the Company reasonably indicates that a consumer has connected additional principal heating equipment without registering the same or takes gas in excess of the limitations established above and such taking becomes persistent or flagrant, the Company may make application to the Public Service Commission for an order authorizing the Company to terminate all service to such customer.

When additional gas supply becomes available and lifting of restrictions on attachment of new gas loads is authorized by the Public Service Commission of New York public notice will be given and connections will be authorized by the Company in the order that applications were registered.

D. Transfer of Gas Service:

In the event that a customer is authorized (by the Company or by the Public Service Commission, whichever is requested in each instance) to transfer an existing gas allotment to a different location, the customer must pay for all costs associated with the installation of a new service lateral or main extension, if these facilities do not exist at the new location.

This tariff provision is to be effective only when the Company has effective tariff leaves that prohibit the utility from attaching any new or increased gas service.

Exemptions from these rules may be granted by the Public Service Commission.

Minimum Insulation standards for Residential Construction of Buildings:

Gas service will not be provided to a new dwelling or to an existing dwelling for the purpose of converting to gas space heating unless the dwelling is in compliance with Part 233 of Title 16 of the Official Code of Laws and Regulations of the State of New York - Minimum Insulation Standards for the Provision of Gas & Electric Utility Service. D. Refund Provision Applicable to All Service Classifications:

In the event that the rates and charges of the Company's gas supplier or suppliers are retroactively reduced, the total amount of refund, including interest, related to sales subject to the Gas Cost Adjustment, shall be credited to customers as follows:

- (b) The rate of refund shall be computed by dividing the total amount to be refunded by the corresponding estimated sales for the next successive 12 calendar months. All refunds concluding during the twelve months ending August 31 of each year will be reconciled with amounts intended to be refunded during that period with any difference applied to the Annual Surcharge or Refund Computation.
